// ANTISPAM JavaScript Function is designed to foil Address Harvesting Robots
// It will help prevent your address from being harvested on your web site.
//
// Link to JavaScript file from any XHTML/HTML document by placing
// in <head> element the following <script> element.
//   <script type="text/javascript"
//     src="http://www.islandman.org/AntiSpam.js"></script>
//
// Call the AntiSpam function in <body> element of XHTML/HTML document
// The AntiSpam function has five parameters that must be strings
//   Tpld = Top level domain in reverse order (instead of ORG use GRO)
//   User = User name in reverse order (instead of THEMAN use NAMEHT)
//   Domn = Domain name in reverse (instead of ISLANDMAN use NAMDNALSI)
//   Subj = Subject of email will automatically use this string
//   Hlnk = Text or Element used for hyperlink (if blank will use address)
// Example:
//   <script type="text/javascript">
//     AntiSpam("gro", "nameht", "namdnalsi", "Your Web Site", "")
//   </script>
```

```
//RevString function reverses the order of characters in a string
```

```
function RevSting(StrIn)
```

```
{
    var StrOut= new String("");
    for(var i=StrIn.length-1; i>=0; i--)
        StrOut += StrIn.charAt(i);
    return StrOut;
}
```

```
// AntiSpam function encodes hyperlinked email address to hide from spammers
```

```
function AntiSpam(Tpld, User, Domn, Subj, Hlnk)
```

```
{
